

Millennium 3 Consulting

Dan Afonso, Enfold IT's founder and president, has been working with MPay and Millennium Licensees since 2002 to bring robust, powerful systems together that can make your payroll processing efficient and reliable.
Complete Systems and Design

When investing in hardware and software for M3, you want to make the right decisions the first time. Enfold IT can help you choose the equipment and software you need to maximize your return on investment.

Some examples of the types of systems we can offer to build or design for you: Value Systems

For the Service Bureau just starting, or one that only plans on running a few clients on M3, the value systems combine processing power, with quality hardware and exceptional warranty service to provide an economical solution to processing about 20,000 checks per month.

Each system can include:

- Fast database server with disk arrays built for speed, and integrated backup facility like tape, or NAS storage
- File server utilizing redundant disks for speed and reliability
- An array of process servers
- Secured synchronization server
- Full-featured firewall to protect the system from external threats
- Your existing, or new printers Enterprise M3

For the established Service Bureau looking for continuous operations, Enfold IT offers enterprise-ready systems.

By using a host of redundant and availability technologies, we can create systems that minimize down time, and still provide the performance needed to run a growing business.

These systems feature:

- Database Clustering for speed and High Availability
- Off-site replication for continuous operations in the event that your primary business location is unavailable
- Replicated file systems storage
- Redundant LAN links
- Management and Monitoring systems with automated recovery System Consulting

Millennium 3 requires a proper installation to perform at its peak. Enfold IT knows how to configure systems, and diagnose them to find the bottlenecks in performance.

We offer:

- Performance audits to pinpoint what could be made better, and where the trouble spots are.
- Disaster Recovery Planning for continual business operations
- Troubleshooting Services to help when there's a problem
- Custom Design Services when an off-the-shelf integration solution isn't enough
- DBA services

All services are fully documented, and guaranteed. We want to help you concentrate on your business and not tie up resources in dealing with ongoing operational issues. Since our list of services is varied, we invite you to contact us for more information. Software

Enfold IT is proud to be a partner of Kemble Design for software and system services. We are distributors of KD products, and can offer:

- Batch Pay Entry Screen for M3
- New Hire Screen for M3
- Home Page for M3 for user search
