

# Network Management

Managed Networks &dash; For Peace of Mind and Profitability

What's it worth to keep your network up and running?

According to Infonetics Research, companies lose 1% of their annual revenue as a result of network downtime. This figure only includes lost productivity &dash; and not missed opportunities.

Enfold IT's Managed Networks service takes the uncertainty and volatility out of your network. Our approach spots potential issues before they become problems &dash; and that keeps you up and running. It also protects you from devastating repair costs if something major breaks.

Our Managed Networks service includes 7/24/365 monitoring of your system and regular maintenance at timely intervals. This comprehensive approach spots potential problems before they become crises. In the rare occasion that a problem arises, Enfold IT takes complete responsibility for fixing it. Service plans range from one-computer offices to complex networks, and are priced competitively:

- Starter Packages from \$260 per month with your existing hardware or \$400 per month with all the hardware included
- Add a terminal server and managed software for a low monthly fee and avoid software purchase fees: Microsoft Office, Exchange, SQL Server, and most other Microsoft packages.
- Available off-site remote backup

Having your network managed brings more than peace of mind: it is a smart business decision. It is, simply put, a small investment that will protect the financial well being of your company.

Your needs are unique, and so are our monthly plans and fees. Contact us to for a free evaluation to learn how we can protect your network.

It will be a phone call you won't regret.

Standard Packages:

- Small Business Express. This provides your 3-15 person company with powerful features including Exchange with Outlook for e-mail, SharePoint for office collaboration, and our comprehensive monitoring to make sure that we catch issues quickly. Using it will centrally manage your data and e-mail while providing you with better security and remote accessibility if desired. This all results in you knowing precisely what data and computers you have and how it's being kept safe from failures and outside influences.
- Small Business Plus. This system pairs the Small Business Express system and adds a remote workplace for you team, allowing all your people working off a reliable and correctly configured central server. This minimizes upgrade costs, as you can now use older computers to get the work done faster, and per users support costs are reduced. In addition, Enfold IT can provide licenses for Microsoft products for a low monthly fee, preventing the large, up-front licensing costs.
