

Instant Network (tm)

Get up and running with an expandable and professional system in no time!

Our Instant Networktm Product is a complete and very affordable networking solution for your office of 3-50 people. It provides you with all the most common components you need to get up and running including:

- Professional e-mail server - Run your own mail domain and have your messages available from anywhere* with Microsoft Exchange mail server. We include Outlook for all your users so they have the latest in email programs at no additional cost
- Secure file server - Using Microsoft Small Business Server, your files are stored and backed up on a file server that is secured against outside eyes
- All the applications you need to get started - We include the latest version Microsoft Office Professional with our system so you can start using Word, Excel, PowerPoint, Access, and more, immediately
- Your applications, your data - We can move the applications you need to run your business (QuickBooks, ServicePro, etc...) along with the data onto the new system at no additional cost
- Experienced Support - You're not on your own, and you don't have to worry about your costs shooting up if the system stops working. Enfold IT takes care of everything so you don't have to worry and you always have someone to call
- Work from anywhere* - Using Remote Web Workplace, you can securely access your applications and computers from home or the road
- Off-site Backup** - Protect your data in the event your office becomes unavailable. Our remote backups systems securely move your critical business data off-site without any human intervention so you don't have to worry about lost data if the unexpected happens.
- Network Protection** - Our advanced firewall replaces your consumer router with full-featured one that provides virus and spyware protection for people browsing the Internet while securing your system against intruders.

All this can be installed in short order and requires you to invest less than hiring a good computer consultant for 4 hours per month!

Our system is simple to use and does not require you to upgrade your current computers if you don't want to. All the applications run on our custom configured terminal server, so even if your personal computer isn't working as its best, your applications will still perform on our hardware. This system is perfect for:

- Small companies starting out that don't want a large, up-front investment in consultants and servers
- Companies that have been struggling along with old hardware
- Companies that seem to keep having broken computers
- Businesses that want their computers to "Just Work"

With packages for 5 people starting at \$495 per month and no installation fees, this is a great value for the hardware, software, and professional services required to make it happen. Give us a call, and see if our solution is right for your business.

* - Requires dedicated always-on, high-speed Internet.

** - Optional
